

COOLEDGE™

CUSTOM GRAPHICS

Cooledge Luminous Ceilings and Acoustic Luminaires support fully custom printed fabric, your artwork, photography, or brand graphic printed directly onto the fabric face of the fixture. We will work with you to ensure the transfer of your image into a luminous reality is successful.

HOW IT WORKS

End-to-end support: From image review to final delivery, our team guides you through every step, we check file quality, colour accuracy, and bleed so the result matches your vision.

1

Share your image

Send us your artwork or logo file.

2

Review the soft proof

Approve a digital preview of your design for the luminaire.

3

We handle production

The fabric is printed and quality-checked

4

Install & illuminate

Ready to install on your Cooledge luminaire.

Note: Additional information may be required during the process, such as the viewer distance to the graphic application. For more information, please contact your Regional Sales Manager or consult the Cooledge Technical Bulletin: Fabric Printing Guidelines.

WHAT YOU WILL NEED TO PROVIDE

Image file:

Vector files (AI, EPS) are ideal as they scale perfectly to any size.

High-resolution photos (TIFF, PSD, JPEG) work best when sized large scale correctly for the viewing distance from the luminaire.

Files should be in CMYK colour mode for the most accurate printed result.

About bleed:

Your image needs to extend slightly beyond the luminaire frame, we call this the "bleed" area.

This is a normal part of fabric printing and installation. Our team will flag it if we need anything adjusted so you don't need to worry about the specifics.
